Profile

Passionate and detail-oriented **MERN Stack Developer** with hands-on experience building and deploying **full-stack web applications** using **MongoDB, Express.js, React.js, and Node.js**. Skilled in developing scalable RESTful APIs, JWT-based authentication, and responsive frontends using **Tailwind CSS** and **Bootstrap**. Completed a **React.js Tranning** with real-world contributions to UI performance and API integration.demonstrating a high level of problem-solving ability, innovation, and collaboration under pressure. Projects include a full-fledged **E-commerce platform, Student Management System, and Razorpay UI Clone**.

Education

CAMBRIDGE INSTITUTE OF TECHNOLOGY, B.Tech

8.6 CGPA

2021 – 2024 | Ranchi, India

JHARKHAND UNIVERSITY OF TECHNOLOGY, Diploma in CSE

68.5%

2016 – 2019 | Ranchi, India

Skills

Programming Languages:

JavaScript (ES6+), HTML, CSS, MySQL

Frameworks and Technologies:

MongoDB, Express.js, React.js, Node.js, Context API, Tailwind, Bootstrap, Material-UI

Developer Tools and Environments and Deployment:

Git, GitHub, Visual Studio, Postman, Vite, Babel, Vercel, Netlify

Conceptual Knowledge:

Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)

Professional Experience

Application Development Intern, E-Pointer Consultancy

06/2022 – 08/2022

- Built and maintained full-stack web applications using Html, JavaScript, CSS, and MySQL Server, enhancing system reliability and scalability.
- Optimized SQL queries and database structures, improving data retrieval speed by 20% and ensuring seamless performance.
- Implemented secure authentication and user management features, strengthening role-based access control and data protection.

Projects

E-Commerce Website, React.js, Node.js, Express.js, MongoDB

- Built a scalable and secure e-commerce platform using JWT (JSON Web Tokens) for user authentication and authorization, ensuring secure access to user-specific data and features. Improving user experience by enabling seamless navigation through 10,000+ products with 40% faster load times. Utilized Morgan middleware enhancing debugging efficiency and reducing server-side issue resolution time by 30%.

Student Management System, React.js, Node.js, Express.js, MongoDB

- Built a scalable Student Management System enabling user to register, log in, and show your details securely using JWT-based authentication and role-based authorization.
- Enhanced academic management for students and faculty through a streamlined dashboard and automated record handling, reducing manual efforts by 50%.

Razorpay Ui Clone, Html, Tailwind css and Javascript

- Developed a responsive Razorpay UI clone as a single-page application using HTML, Tailwind css and Javascript.
- Implemented smooth navigation, interactive UI components, and pixel-perfect styling to replicate Razorpay's users experience.
